Construction on 11th Avenue North to commence August 24, 2020

The City of Williams Lake would like to inform residents that construction is scheduled to begin the week of August 24, 2020 on 11th Avenue North. The proposed works include street widening, sidewalk additions, and drainage improvements. The work is expected to last approximately 6 weeks.

The affected area includes the intersection of Smedley Street and a portion of 11th Avenue approximately 200 metres long to the east. The Smedley intersection and this part of 11th Avenue will remain closed during construction; traffic will be directed to detours through posted signage. Access to businesses on 11th Avenue will remain open at all times.

Please use caution when driving near construction areas and obey all traffic control personnel, signs, and devices. We appreciate the public's cooperation and patience as we make these improvements.
